

Exchange of FLexLM licenses

Latest versions of Bruker NMR software use the CodeMeter licensing system. We offer a possibility of a complimentary exchange of existing FlexLM licenses for corresponding CodeMeter license tickets.

Please fill this form (* marks required fields), print and sign and send it to License.NMR@bruker.com.

Please note, that AMIX 3.0 and SBASE licenses cannot
be ordered here , because these products do not support
CodeMeter.

I hereby confirm that I will delete the FlexLM software license(s) specified above from the computer or ensure by other means that they are no longer used. I understand that it is my responsibility to take all action required to ensure that no one uses these retired licenses after a transition period of four (4) weeks after the exchange license(s) has/have been delivered. I understand that after the transition period of four weeks, the only valid license(s) I will have for the software(s) indicated above will be the new CodeMeter license keys. I agree that use of a retired license after the end of the transition period will automatically represent a firm order for (an) additional license(s) of this software (unless otherwise agreed upon in writing by an authorized Bruker employee) for which payment is due without any delay starting from the day of such use. For delays in payment, an interest payment will be due and will accrue at 2% above the current prime rate(s). *
