

## **NMR Lab Manager**

Saint Louis University, a Catholic Jesuit institution dedicated to student learning, research, health care, and service seeks applicants for a NMR lab manager (staff position). The lab manager will be responsible for maintaining a new 700 MHz NMR that will arrive on campus in the Fall of 2016. A Ph.D. is required, as is some experience in running a NMR facility. It is also expected that the lab manager will have expertise in the area of chemical biology so that they can help potential users in this research area with high field NMR experimental design and implementation. There is also the possibility of teaching an occasional graduate course in NMR spectroscopy. Review of applications begins immediately and will continue until the position is filled. Applicants must first apply online at <https://jobs.slu.edu>. Applicants should also send a CV, transcripts, statement of their NMR research experience (in terms of applications, data interpretation, and helping to run a facility) and 3 reference letters to the attention of Prof. Scott Martin at [nmrsearch@slu.edu](mailto:nmrsearch@slu.edu). Saint Louis University is an affirmative action, equal opportunity employer, and encourages nominations and applications of women and underrepresented minorities.
